RECEIVED

NOV 28 2003

TC 1700

Sir :

In response to the Examiner's Restriction Requirement of October 22, 2003, setting a one month period for response extending until November 24, 2003 (November 22, 2003 being a Saturday), Applicants elect the Invention of Group II, with traverse, for the reasons expressed below. Claims 7 - 20 are considered to be "readable" on the invention of Group II (as set forth by the Examiner).

Applicants respectfully traverse the Restriction Requirement. The Examiner has characterized the inventions of Groups I and II as "related as process and apparatus for its practice". The Examiner has stated that the "the process claimed can be practiced by another and materially different apparatus such as a clamp that does not rotate and is not controlled or the process could be practiced by hand. Additionally, the apparatus as claimed can be used to practice another and materially different process such as radially pressing a heat shrinking tube as it shrinks.

However, even if the Examiner's characterization of Groups I and II as defining related process and apparatus for its practice were to be considered correct, Applicants respectfully request that both of the inventions defined in claims 1-20, nevertheless, be

P21539.A03

examined in the instant application, pursuant to the guidelines set forth in M.P.E.P. §803. That is, the Examiner is respectfully requested to reconsider the requirement and find that there would not appear to be a "serious burden" on the Patent and Trademark Office in examining claims directed to the non-elected invention since the Examiner will have to search for a method quite similar to that of claims 1 - 6 while searching for the apparatus of claims 7 - 20.

It would appear that the search for the inventions identified by the Examiner would be coextensive or at least significantly overlap. That is, if the Examiner were to perform a search for the invention of Group II, there would not appear to be a serious burden in continuing the examination of the other invention of Group I. For this reason, and consistent with office policy as set forth in M.P.E.P. 803, Applicants respectfully request that the Examiner reconsider and withdraw the Requirement for Restriction.

For the foregoing reasons, it is submitted that the Requirement for Restriction in this application is improper and it is respectfully requested that it be reconsidered and withdrawn.

Should there be any questions, the Examiner is invited to contact the undersigned at the below listed number.

Respectfully submitted,
Ryoukichi YASHIMA et al.
